

HOW TO

Guide to Fanatec's CSL Cockpit V1.5

Last updated: March 30, 2026

Getting good results in sim racing requires a lot of practice and the resulting consistency. While this can surely be achieved with a desk setup using table clamps like the [CSL DD Table Clamp](#) or [ClubSport DD Table Clamp](#), a dedicated rig or cockpit can be highly beneficial. The [CSL Cockpit V1.5](#) is a great entry point if you want to take your sim racing experience to the next level.

Features

Despite its light and minimal appearance, the CSL Cockpit is highly versatile and adjustable. The strong and lightweight trapeze chassis constructed from aluminium tubing and steel brackets is optimised for minimum flex and high structural strength. This allows the [wheel base](#) to be transferred to your hands without loss of input and the road's characteristics – keeping you in full control at any time. It is also designed to handle [pedals](#) with load cell brakes for consistency.

Both the wheel base and pedal mount can be adjusted in angle and position to suit your driving position. The wheel base can also be mounted inverted –

Compatibility

Bases

- All CSL Elite Wheel Bases
- **CSL DD / Gran Turismo DD Pro**
- ClubSport Wheel Base V1 / V2 / V2.5
- **ClubSport DD / ClubSport DD+**
- **Podium DD1 / DD2 / DD1 PS4 / Podium DD (2026)**
- **Third-party wheel bases**

Pedals

- **CSL Pedals**
- CSL Elite Pedals
- **CSL Elite Pedals V2**
- **ClubSport Pedals** (all versions)
- Third-party pedals

Others

- All **ClubSport Shifters** (with CSL Cockpit Shifter Mount, sold separately)
- **ClubSport Handbrake** (all versions, must be mounted to the side of a ClubSport Shifter)

Assembly

The CSL Cockpit V1.5 can be set up very easily. All tools you need are included. Usually, the process will take somewhere between 45 – 90 minutes. Some of the steps can be easier with a person assisting you but can also be done on your own. Make sure to set up the cockpit in the place you are planning to use it and to attach the included protective foot pads (felt and rubber)

depending on either carpet or hard flooring. For more information, check our dedicated [Explorer article](#) and [Quick Start Guide](#).

Accessories

If you want to get the most out of your CSL Cockpit, Fanatec offers a wide range of accessories to expand your rig's versatility even more:

CSL Cockpit Seat

At just 7 kg, the CSL Cockpit Seat is an ideal match for the strong and light CSL Cockpit. With a durable woven fabric and supportive foam cushioning, it's comfortable for those long sim racing sessions.

CSL Cockpit Seat Sliders

These sliders provide a fast and convenient way to adjust your seat position, particularly when the rig is regularly used by different sized drivers. Many third-party seats are also compatible with the seat sliders (check your seat manufacturer's documentation).

CSL Cockpit Monitor Holder

The CSL Cockpit Monitor Holder supports a wide range of monitor sizes. By bolting directly to the rig, you know it will remain in the same position every session. With height and lateral adjustment options, you can find the perfect position of your display. The kit includes extra supports for keeping those huge ultrawide monitors completely stable, even when you're fighting with a high-torque direct drive wheel base.

CSL Cockpit Monitor Stand

The CSL Cockpit Monitor Stand is designed to match the appearance of the CSL Cockpit and offers stable support for displays up to 60". Find the perfect position for your display. Included mounting plates fit VESA standard patterns of 100 x 100 mm, 200 x 100 mm and 200 x 200 mm.

CSL Cockpit Shifter Holder

The CSL Cockpit Shifter Holder can be easily mounted on the left or right side of the driver. You can mount your Fanatec Handbrake too – the bracket design is strong enough to support both. With height and lateral adjustment options, you can find the perfect position of your shifter for optimum comfort and performance. It is sturdy even at its highest position.

CSL Cockpit Shelf

Lifting your PC or console off the floor can help to improve cooling, and your setup will look much cleaner. The shelf is sturdy enough to handle heavy gaming PCs without increasing the compact footprint of the CSL Cockpit.

CSL Cockpit Keyboard Holder

The CSL Cockpit Keyboard Holder can be installed anywhere along the main frame of the CSL Cockpit, or on the optional CSL Cockpit Shelf. It allows for easy and quick access to not only keyboards, but also accessories like controllers or headsets.
